

Read this before you start to travel!

- Make sure, that
 - all the windows, roof lights, service flaps, and doors are properly closed
 - TV-antenna is down and locked, TV-mount is in locked position
 - fridge's door and all closet doors are closed
 - there are nothing in the fridge that can fall down, and all the tables and work surfaces are empty (so nothing will fall down when driving)
 - the toilet hatch is closed (inside the toilet), so there won't be any nasty surprises
 - you remembered to unplug the electric cable from the wall
 - water pump is closed
 - luggage is placed so that the heavy things are in the bottom and the light things are on top
- Remember also **that the motor home is 3,2 m high** and the end of the car is behind the wheels. So go around any obstacles a bit further and remember the height when you are in the gas station and going under any obstacle!

When driving

- Pay attention that the side wind and slipstream from trucks and busses affect the motor home.
- Keep children in seatbelts when driving in case of emergency breaking.
- Don't drive with gear number 6 in uphill roads. The recommendation is that you don't use gear number 6 when driving less than 100 km/hour.
- Check oil and liquids after every 1000 km. There are additional liquids and oil in the maintenance box. You can add them if the amount is less than minimum.
- Please remember that you are a bit bigger than the others. Give room to others and drive as a true motor home owner. You are on vacation so don't stress and there is no hurry!!
- The tire pressure is 5 bar.

Returning

- **Follow the agreed return time!** The next renter is most probably leaving during the same day.
- Return the motor home with the same amount of diesel that there was when you received the car.
- Clean the motor home from inside and empty the toilet. We will charge extra if you haven't done them.
- **PLEASE NOTIFY US IMMEDIATELY, IF THERE IS SOMETHING WRONG WITH THE MOTORHOME! SO WE KNOW TO RESERVE TIME FOR MAINTENANCE.**

When you camp and nothing works, read the manual first. If nothing still doesn't work call me.

Have a fun vacation!
